Evidence

English	Russian
Evidence	доказательство, свидетельство, данные
Assertion	утверждение, заявление, тезис
Scientific evidence	научные данные / научные доказательства
Refute	опровергать, отвергать
In accordance with	в соответствии с
Accumulated	накопленный, собираемый
Phenomena	явления, феномены
Supporting	подтверждающий, поддерживающий
Rejecting	отвергающий, отклоняющий
Hypothesis	гипотеза
Claim	утверждение, заявление, притязание
Findings	результаты (исследования), выводы, находки
Thesis	диссертация

1. What is the difference between evidence and scientific evidence?
   All scientific evidence is evidence, but not all evidence is scientific. Scientific evidence requires a strict methodology.
2. How is evidence accumulated in scientific research?
   Evidence in scientific research is accumulated in two main ways:
   - through **observations of phenomena** that occur naturally in the real world;
   - through **experiments** carried out in a laboratory or in other controlled conditions.
     The collected data is then interpreted according to the scientific method, and it usually goes towards supporting or rejecting a hypothesis.
3. What is a claim? How to prove a claim?
   A **claim** is a contentious or debatable assertion made by someone. The **burden of proof** always lies on the person who makes the claim.
   To prove a claim in science, the presenter must:

- write a paper presenting their specific **findings**;
- defend their **thesis** against all challenges before a **panel of judges** (i.e. peer reviewers or a scientific committee);
- provide sufficient evidence and arguments to support their position.]

Fact

English	Russian
fact	факт (действительное положение вещей, то, что произошло на самом деле)
verifiability	проверяемость, верифицируемость (возможность доказать или подтвердить на практике)
reference works	справочные издания, справочники, справочная литература

1. The Russian Department of Agriculture recommends that adults consume three to four cups of vegetables per day.
   - **Fact**
   - Это объективное утверждение. Мы можем открыть официальные документы или сайт Министерства сельского хозяйства и проверить, существует ли такая рекомендация на самом деле.
2. Playing team sports is the better way to lose weight.
   - **Opinion**
   - Слово *better* (лучший) выражает субъективную оценку.
3. Research shows that a diet low in salt helps people to lower their blood pressure.
   - **Fact**
   - Утверждение ссылается на результаты научных исследований. Наличие этих исследований и их конкретные выводы можно объективно проверить и верифицировать.
4. Home-cooked meal tastes better than meal in restaurants.
   - **Opinion**
   - Фраза *tastes better* (вкуснее) описывает личные вкусовые предпочтения.
5. Research indicates that young people who ate meals with their parents did well academically.
   - **Fact**
   - Как и в пункте 3, здесь констатируется результат проведенного исследования (корреляция между совместными приемами пищи и успеваемостью). Этот результат можно проверить, обратившись к первоисточнику (научной статье).

№ 9

1. Unfortunately, there is scarce **reliable** data (can be trusted) to suitably determine the various internal commercial links. *(reliable = надежный, заслуживающий доверия)*
2. A substantial amount of **empirical** data (based on observation rather than theory) was required for the verification of assumptions, estimation of parameters, fitting of distributions and validation of output. *(empirical = эмпирический, основанный на опыте/наблюдении)*
3. The apparatus used in the experiment is simpler than that which would be desirable to obtain fully **accurate** data (correct, exact, without any mistakes). *(accurate = точный)*
4. The design of semi-structured interviews enables interviewees to elaborate on their answers, and the interviewer to ask probing questions, so **comprehensive** data (full, complete) can be obtained. *(comprehensive = всеобъемлющий, полный)*
5. The present essay is a comment on Nagel's 'Brain Bisection and the Unity of Consciousness' (1971) in which he argues that the data relating to patients who have undergone corpus callosotomy constitute **conflicting** data (contradictory) with regard to the idea of the necessary unity of consciousness of a person or mind and of mind being something numerically absolute. *(conflicting = противоречивый)*

№ 10

1. The Health Service should not be judged by financial **criteria** alone. *(criterion во мн. ч. -> criteria)*
2. In this example X' **denotes** the time taken and 'Y denotes the distance covered. *(3 лицо, ед. ч., Present Simple)*
3. The data was/were **collected** by various researchers. *(Passive Voice, Past Participle)*
4. The report **assigned** *(или assigns)* the blame for the accident to inadequate safety regulations. *(Past Simple или Present Simple, "assign blame" — устойчивое выражение "возлагать вину")*
5. Businesses are beginning to feel the full **impact** of the recession. *(существительное)*
6. It is important to see all the fighting and bloodshed in his plays in historical **context**. *(in historical context — в историческом контексте)*
7. She has lots of good ideas, but she has difficulty **formulating** them. *(после have difficulty используется герундий -ing)*
8. Falling export rates have **impacted** on the country's economy quite considerably. *(Present Perfect, глагол)*
9. A new system has been **devised** to control traffic in the city. *(Passive Voice, Past Participle)*

№ 11

№	word	correct	Correct Spelling
1	quantitetive	❌	**quantitative** (через **a**)
2	procesing	❌	**processing** (удвоенная **s**)

№	word	correct	Correct Spelling
3	raw	✅	-
4	enviroment	❌	**environment** (пропущена **n**)
5	circumstantial	✅	
6	contridictory	❌	**contradictory** (через **a**)
7	verifability	❌	**verifiability** (пропущена **i**)
8	measurement	✅	-
